EDUCATION

Purdue University

West Lafayette, Indiana

B.S in Data Science

Expected Graduation: May 2030

Relevant Coursework: CS 18000 – Problem Solving & Object-Oriented Programming, CS 19300 - Tools, Calculus I, TDM 10100 – The Data Mine

EXPERIENCE

Nexgen Tech Solutions

Frisco, Texas

Software Intern

May 2025 - July 2025

- Engineered and tested data ingestion and transformation workflows using Python, Spark SQL, and Azure Data
- Lake Diagnosed data and code issues using Git/GitHub while contributing to tasks in an Agile development environment
- Created dashboards to track data trends, project metrics, and reporting results

Zimetrics LLC

Austin, Texas

Data Science Intern

July 2024 - August 2024

- Developed and evaluated machine learning models in Python and TensorFlow for forecasting and lead-scoring applications
- Prepared datasets through data cleaning, feature selection, and preprocessing to support model development
- Visualized trends, model performance, and business insights through interactive Power BI dashboards

PROJECTS

Audio Intelligence Platform | Python, Flask, JavaScript, HTML/CSS

Link: <https://spotify-song-analyzer.onrender.com/>

- Developed Sonar.ai, an AI-powered music analytics platform using JSON-based music datasets
- Built features including song recommendations, mood classification, analytics dashboards, and song comparison using audio feature similarity
- Improved UI/UX with a modern responsive frontend, interactive filtering, and production deployment using GitHub and Render

Purdue Research Matchmaker | Python, Flask, JavaScript, HTML/CSS

Link: <https://purdue-research.onrender.com/#explore>

- Created a research discovery platform that connects students with Purdue faculty and research opportunities through keyword-based matching
- Implemented search, filtering, and automated outreach email generation within a responsive web interface
- Streamlined faculty discovery by helping students identify relevant research opportunities and prepare targeted outreach

SKILLS

Languages: Python, SQL, JavaScript, Java, HTML/CSS

Frameworks/Libraries: Flask, Pandas, TensorFlow

Tools: Spark SQL, Azure Data Lake, Power BI, Git/GitHub, Render

Certifications: Microsoft Azure Data Fundamentals (DP-900)
